PROFESSIONAL SUMMARY

Passionate DevOps & Software Engineer with proven enterprise expertise in automating deployment pipelines, orchestrating containerized microservices, and managing full product lifecycles at IBM. Highly proficient in building CI/CD solutions, Linux/Unix administration, and leveraging Python for infrastructure automation. Demonstrated success in optimizing system performance, engineering high-throughput log aggregation systems, and implementing service health-monitoring for mission-critical, large-scale environments. Adept at bridging software development and infrastructure to deliver high-availability, secure, and scalable cloud-native solutions.

EXPERIENCE

IBM India Software Labs

Jan 2024 – Present

Software Developer

Kochi, Kerala, India

- **CI/CD Architecture & Cloud Infrastructure:** Streamlined release pipelines across SaaS and CP4D environments, migrating from Travis CI to SPS/Tekton for enterprise compliance. Architected unique port-based deployments per GitHub PR via custom Python bots, reducing software release lifecycles by 40% and boosting bug identification efficiency by 200%.
- **Platform Reliability & Automated Self-Healing:** Engineered a highly concurrent, Jenkins-driven Quality Health-Bot monitoring Fyre (internal cloud) VMs and OCP+ clusters. Implemented dynamic cluster discovery, automated recovery protocols (e.g., auto-rebooting nodes), and rich-formatted Slack alerts, drastically reducing system downtime and manual intervention.
- **Full-Stack Development & Data Integration:** Developed a highly scalable web application for the Match360 Quality Dashboard using a Python RESTful API and React.js, achieving a 25% reduction in latency. Integrated MongoDB to build a dedicated statistics microservice with interactive visualizations for sprint metrics, eliminating manual reporting.
- **Disaster Recovery & Database Engineering:** Architected a fully automated backup and point-in-time restore pipeline for Dockerized MongoDB clusters across 8 databases. Developed custom Bash scripts to orchestrate daily backups, secure ZIP-compressed storage in JFrog Artifactory, and automate 30-day retention lifecycles.
- **Product Delivery & Cross-Functional Collaboration:** Coordinated seamless release cycles across teams to minimize deployment risks. Resolved critical microservice defects prior to cloud General Availability (GA), significantly improving platform usability and customer adoption.

TECHNICAL SKILLS

DevOps & Infrastructure: Docker, Kubernetes, Jenkins, Travis CI, Linux/Unix Administration, CI/CD Pipeline Automation, Infrastructure Management

Languages: Python, Java, Kotlin, C++, JavaScript (ES6+), Golang (Learning)

Subjects: Data Structures, Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Computer Networks, Software Engineering, System Design, Discrete Mathematics

Backend & Monitoring: RESTful APIs, Microservices, Node.js, Elasticsearch, Log Monitoring, Firebase, MongoDB

Networking & Security: DNS, Load Balancing, TLS/SSL Concepts, Cryptography Fundamentals, CCNAv7 Essentials

Methodologies & Tools: Git, GitHub, Maven, Gradle, Agile/Scrum, Test-Driven Development (TDD)

EDUCATION

Lakshmi Narain College Of Technology, Bhopal, India

Aug 2019 – May 2023

Bachelor of Technology

GPA: 8.66/10.0

PROJECTS

High-Throughput Log Aggregator | *Java, Spring Boot, Kafka, Elasticsearch, Docker*

Feb 2026 – Mar 2026

- Architected a scalable, containerized log aggregation and monitoring system engineered to efficiently handle and process 10,000+ events per second.
- Implemented a robust Spring Boot consumer to seamlessly ingest high-volume log streams from Kafka, ensuring fault tolerance and continuous data flow.
- Indexed processed logs directly into Elasticsearch to enable ultra-fast, real-time querying, deep log analysis, and comprehensive system monitoring.

Bit Media App (github.com/maniesh/Photos) | *Kotlin, Jetpack Compose, MVVM Architecture* July 2023 – Present

- Developed a modern, highly maintainable Android application leveraging Jetpack Compose and Kotlin within an MVVM Clean Architecture.
- Integrated advanced search functionalities and seamless navigation for localized media, demonstrating a strong grasp of end-to-end software development lifecycles.

CERTIFICATIONS

Java Full Stack & Java J2EE Certification – Wipro TalentNext

Developer Virtual Experience Program – Accenture

Software Engineering Certifications (Java, SQL, Problem Solving) – HackerRank

Networking & Cyber Security Essentials (CCNAv7) – Cisco Systems
